

WeBump is committed to protecting your data. Our privacy policy is part of the terms of the services we provide. This document provides information on how we may use, collect and share information about our users. We recommend that users read our privacy policy. The user should be fully informed and aware of the legal provisions on privacy. If you have any questions about the WeBump Privacy Policy or our approach to data protection, please contact us at the following e-mail address: contact@webump.io.

WeBump's privacy policy describes:

- the types of data we may collect
- refers to the way WeBump uses the collected information
- the aspect of sharing the information we collect
- the legal basis for the use of personal data
- the legal basis for the use of personal data
- protection and storage of information collected by WeBump
- third party services and content
- user rights

1. Information that you provide to us directly

Some WeBump services can be used without providing us with any personal information. However, when verifying your account with KYC, or taking part in whitelist signup, aidrop , you provide us with your personal information. Personal data, i.e. name and surname, e-mail address and other data that may be required. You will need to establish a connection between the WeBump platform and the cryptocurrency wallet when purchasing WeBump tokens and in order to obtain all the entitlements to use the WeBump platforms. In this case, the user's password and credentials are stored locally on the user's device. Such information is never sent to WeBump.

In the event that the user contacts us directly, we may also obtain information about the user. In the e-mail, the user may provide his name and surname, e-mail address, content of the message, attachments or telephone number. WeBump may also receive any information you choose to send us. WeBump may also receive a confirmation if you choose to read the email sent by us.

2. Information We May Collect Indirectly.

WeBump uses browser cookies and similar tracking technologies to collect and store the information we need when you use, access, and interact with our platforms.

Cookies are relatively small information files that are usually stored in browsers, computers or devices that allow our servers or external service to recognize a given user.

Information collected via cookies is collected to record user preferences, as well as settings and service status of a given platform. Cookies also allow for the analysis of user activity on a given platform. You should be aware that in some countries, the information related to this paragraph may be considered personal data.

Using cookies, we can collect information about the type of device the user is using to access WeBump platforms. It may also include information about the operating system and its version, the user's IP address, the general geographic location based on the IP address, browser type and data about the user's interaction with the platform. The information collected may concern search terms searched on

the internal search engine of the platform or the frequency of using the platform. WeBump may also collect data about the functioning of the services we provide within the platform in order to be able to continuously improve our platforms, develop new features and, of course, protect the security of the platforms and users. The data can be used for collective analysis or business analysis, such action will help us increase the awareness of decisions made and enable WeBump to report on the results of its activities.

3. Information We May Collect From Third Party Sources

There is a chance that WeBump will receive information about users using the services of its subcontractors, third parties. WeBump subcontractors will update, extend, analyze our records and prevent and attempt to detect any fraudulent attempt. If you decide to use third party services on our platform, you will receive authentication information to be able to authorize this connection. When using the services of third parties, please remember that in this case we use the privacy rules and procedures adopted by the given subcontractor.

WeBump also announces the possibility of collecting information from social media, which provides information about user interactions with our content on certain social networks. In addition, we may also receive publicly available information about our users from our subcontractors and combine it with the data we already have about the users.

4. How WeBump uses the collected information?

We use the information we obtain in various ways, including:

- The information is used to provide, operate and maintain our platforms
- The collected data allows for improvement, personalization and extension of the number of services provided in the WeBump ecosystem
- The information obtained allows WeBump to understand how our platforms are used by users
- Observation of user activity translates into the emergence of new concepts regarding the product, services and functions
- The information allows you to increase sales of our services or promote WeBump platforms. They will also help in assessing the effectiveness of our activities, promotional campaigns and publications.

The aforementioned uses may refer to information that has been modified such that the information is no longer associated with a specific person.

5. How can we share the information we collect?

We can share the data:

- Other users of our platforms
- Certification company
- WeBump employees and contractors. Our employees can access all the information that will be collected. Employees and our subcontractors are required to maintain the absolute confidentiality of the information they have access to. This information may not be used for any purpose other than to enable the use of the platform or to process the requests received.

- Seller and service providers. The data may be shared with vendors and service providers who provide services on behalf of WeBump.
- External partners
- When signing up by referral, we may share information with the referrer to inform that person that someone has used the referrer's link to register
- Data analysis companies.
- Information may be disclosed and otherwise transferred to: potential WeBump buyer, new owners, or successor to current owners.
- Information may also be transferred as a result of a merger, takeover, sale of assets, insolvency, bankruptcy.

6. 6. With the consent of the users, we may share the following information.

Collective information is permitted by law to be used and shared with our partners in a modified or non-verifiable form.

7. Legal basis for the use of personal data.

WeBump's legal basis for collecting and using personal data will depend on the specific purpose for which certain data will be collected by us. Typically, WeBump collects and uses personal information only when necessary. The need to collect data occurs when:

- a) We want to provide services for which the said data is needed
- b) It is in our interest and does not override your rights
- c) The collection of rights takes place with the consent of the user
- d) We have a justified need, such as the desire to improve our platform, the willingness to undertake marketing activities, or to prevent illegal activities

There may be occasions when we ask you for personal information in order to comply with a given legal requirement or to fulfill our obligations under a contract with you. We will explain the reason for this request in a timely manner and inform the specific user whether the provision of the data is obligatory and the consequences of not providing your personal data.

Users, remember that you have the right to withdraw any consent given to the use of your personal data.

8. How WeBump stores and protects collected information?

WeBump implements various types of security to meet all legal requirements for the protection of collected data and information.

Please note that no information system can be 100% secure, so we cannot guarantee 100% security of our users' information. Additionally, you have to bear in mind that the information sent via the network by users to WeBump is not controlled by us.

We only store your personal data when we have a legitimate business need to do so. An example may be the willingness to provide a service, compliance with legal or tax obligations.

We store the information collected for no longer than is strictly necessary to achieve our goals and fulfill legal obligations.

9. User Rights and Choice

The user has full right and choice. Your right and choice can affect the collection and sharing of information about you.

The user can use the features of the WeBump platforms that do not require a connection using a cryptocurrency wallet. In this way, you can limit the type and amount of information potentially collected

Remember, user, if you choose not to accept cookies or disable them, some features of our platforms may no longer work.

10. WeBump and minors

WeBump platforms are not targeted at minors under the age of 16. WeBump never knowingly collects personal information from children under the age of 16. If you are under the age of 16 you must ask your parent or guardian for permission to use our services.

11. Introducing changes to the privacy policy.

Changes to the WeBump Privacy Policy may be made from time to time, so the above document may be updated. WeBump is committed to informing users when material changes are made to its Privacy Policy.
