

#Intelligence2Earn

WeBump

Read to Earn ecosystem

Earn crypto by publishing your content

# Publishing Industry

**WeBump** is an intelligence to earn platform in the early stage of development.

The **WeBump** ecosystem embodies an opportunity to onboard thousands of new publishers and content creators into the Blockchain sphere.

Our mission is to create a useful platform and ecosystem with a specially adapted proprietary solution, which will make it possible to support your favorite authors using cryptocurrencies. The platform will have a simplified interface and transparent solutions.

# Why you need WeBump?

## Authors:

Control the distribution with a verifiable blockchain mechanism and transparent process of creation and distribution.

## Publishers:

Defend book distribution process from piracy. WeBump provides a solution that controls the whole process of publishing, from creation to distribution.

## Readers & Collectors:

One-time fee for access with real rights to digital books. A community-driven platform with a marketplace for reselling.

# How WeBump works

With the WeBump platform, we want to solve many problems of book distribution. Our easy-to-understand interface guided users to easily grasp the basic concepts for understanding the advantages of Web3 technologies. Our proprietary platform will give you a 100% guarantee that the creator will earn royalties for each trade of the book. Thanks to smart contracts it is possible to transfer payment for the book immediately to the creator. Authors don't need to wait weeks before their payment will be sent. Solving these problems will change the industry for the better and allow users to create and earn much easier.

Thanks to the automatically generated Smart Contracts, the ebook can be resold, swapped, or picked up in physical form. Decentralizing the license holder base together with the decentralized network will deliver a level of security that is unobtainable in a centralized system. Instead of buying files that have merely been duplicated, they are buying one-of-a-kind editions.

We are committed to the maximum possible transparency. We hope that by guaranteeing absolute certainty that the funds will go to the right place, readers and collectors will be more engaged in supporting their favorite creators.

WeBump provides an ecosystem that excludes the risk of embezzlement of the funds donated by the readers and collectors. WeBump is based on two main foundations: transparency and trust. Japanese author Haruki Murakami said: "There is nothing in this world as difficult to gain and as easy to lose as trust". Thanks to its transparent ecosystem, WeBump intends to earn the trust of the community and do everything in its power not to lose it.

# The BUMP token

The **WeBump** token will act as fuel for our ecosystem. The **\$BUMP** token is a state-of-the-art, secure and instant unit that will be used for financial purposes.

Users can earn the token through the secondary market. We create a mechanism for the content creator to receive a profit, with the cost of the transaction being on the side of the recipient.
